Safety warnings

Wear safety glasses
Solder and flux can spatter, and clipped wire ends can fly.

Work in a well-ventilated area
Flux fumes can irritate eyes and airways and cause allergic reactions. Work in a ventilated room.

The tip gets very hot
Up to 400 °C, and it stays hot after switch-off. Always park the pen in its holder.

Wash your hands
Don't eat, drink or smoke while soldering. Clean up when you finish.

Charge the battery safely
Use a 5 V USB-C charger, never unattended. Stop using the fan if the battery swells or gets hot.

Not a toy · ages 14+
Contains magnets and small parts. Keep away from small children.

Sharp tools
The knife and flush cutter are sharp. Cover the blade after use.

Use the right power
A USB-C PD or QC 3.0 charger or power bank delivering 45 W (15 V, 3 A) for full heat.

WARNING: INGESTION HAZARD. The Deluxe kit's multimeter contains a button cell or coin battery. **DEATH** or serious injury can occur if ingested. A swallowed button cell or coin battery can cause internal chemical burns in as little as **2 hours**. **KEEP** new and used batteries **OUT OF REACH OF CHILDREN**. Seek immediate medical attention if a battery is swallowed or inserted into any part of the body.

Disposal. Don't put electrical parts or batteries in household waste: take them to a collection point for electronics and batteries. Collect solder scrap, used tips and brass wool and take them to your local recycling centre.
